# avast! Email Server Security

With newly added features, avast! Email Server Security scans your company's email traffic, providing vital protection for your mailbox servers and ensuring your data remains shielded from detrimental loss.

Standard features include high-performance scanning, superior scalability, and clustering support (even in active/active mode), with handling capability for an unlimited number of mailboxes. Licensed according to total number of mailboxes, it also integrates perfectly with Microsoft Exchange Server, via Microsoft's Virus Scan APIs.

Key Features – avast! Email Server Security

ANTIVIRUS AND ANTI-SPYWARE ENGINE
Innovative scanning engine protects against viruses, spyware, and other malicious agents.

HEURISTICS ENGINE
Proactively finds malware undetectable with normal definitions and virus signatures.

INTELLIGENT SCANNER
Reduces the number of required file scans up to 80% through a white list of safe applications. Files identified as safe are not rescanned unless they change.

GREEN COMPUTING
Leaves a minimal footprint due to its efficient and effective technology.

MULTI-THREADED SCANNING OPTIMIZATION
Allows the splitting of large files between cores, which accelerates the scanning process on new multi-core CPUs and makes avast! run even faster.

CODE EMULATOR
Uses dynamic translation (much faster than traditional emulation) for both generic unpacking and within the heuristics engine.

SMART VIRUS DEFINITION UPDATES
Incremental updating minimizes the size of regular update files.

FAST APPLICATION OF UPDATES
New format for the virus definition file means faster updates, reducing demand on CPU/memory, for uninterrupted computing.

SIMPLE ATTACHMENT BLOCKER
Blocks attachments based on their file extension.

EXCHANGE PLUG-IN
For tight integration with the Exchange server.

SYSTEM REQUIREMENTS:
256 MB RAM and 300 MB of free hard disk space for MS Windows server 2003
2 GB RAM and 300 MB of free hard disk space for MS Windows server 2008
Microsoft Exchange server 2003 – 2010 (all SP versions)

CERTIFICATION:

BACKGROUND SCANNING OPTION

Scans without impeding day-to-day operation of the server.

NOTIFICATION MANAGER

Built-in and customizable, to ease your workload.

EASY TO NAVIGATE GRAPHICAL INTERFACE (GUI)

Offers a user-friendly central window to all program functions.
